MALIBU MATRIX

PIPER POWERFUL

Flying the Malibu Matrix is such a rush. You sense all the tightness and precision of its Piper genetics. You're instantly at home in its ergonomic flight deck—your every move intuitive and effortless.

Your passengers stretch out in comfort, rave about the headroom, and the solid, quiet ride. It's a feeling of freedom that comes from having this kind of Piper luxury all around you, and this level of Piper power in front of you.

The Matrix. Run with the big boys.

I AM PRECISELY WHERE

I WAS MEANT TO BE, IN THE AIRPLANE I WAS MEANT TO FLY.

Piper[®]

HIGH-CLASS LOOKS ON THE TARMAC,

PIPER IMPRESSIVE

There's more than one way to recognize quality in your Matrix. Sink back into soft, well-upholstered seats. Reflect on the thoughtful personal comforts all around you as you settle in for a comfortable short- or long-range flight. Everywhere you look is Piper craftsmanship—even the smallest detail has been carefully thought through and refined.

The Piper Matrix. More room. More payload. More luxury. And more of every reason you fly. Think about it: a retractable gear, high-performance piston single with six comfortable club seats, and 25,000 feet of sky available if you need it.

HIGH PERFORMANCE IN THE SKY.

PIPER INTUITIVE

It's all about that good Piper DNA. And the new Malibu Matrix does its Piper bloodline proud. This is classic Piper intelligence, brought into a new millennium with an all-glass cockpit, a 350 hp piston engine and tight, responsive controls. Get ready for new levels of handling, comfort and performance. Get ready for Piper confidence.

Oh, and did we mention the six sublime seats?

NOTHING COMES CLOSE TO THE MATRIX.

PIPER LUXURIOUS

Step up to the next generation of cabin-class sophistication. This is what you've been missing. More space, more range, more power. The Matrix delivers uncompromising luxury and unpressurized simplicity. Piper design is always so solid.

You're in command long before you board your aircraft. The cabin-class entryway welcomes everyone with style. Convenient nose and aft cabin storage make short work of loading. Once comfortably aboard, your passengers stretch out behind you, happily relaxed.

As you step into your flight deck, you relax, too. You're piloting a Piper, after all. With all the engineering and reliability that entails.

PIPER ENHANCED

The flight deck of the Piper Matrix has been redesigned to keep you comfortable and alert. There's more head and leg room now, along with inflatable lumbar supports beneath the rich leather seats.

The Matrix G1000 option marries heightened situational awareness with unrivaled simplicity. The Garmin G1000 and GFC 700 autopilot suite seamlessly integrates navigation, communication and one of aviation's most advanced autopilots into one easy-to-use system.

Dual 10" PFDs display synthetic vision, WAAS-certified GPS, optional traffic, terrain and XM weather/radio. An expansive 15" MFD makes it easier to manage engine functions, read electronic approach plates and Garmin's SafeTaxi® airport diagrams. It's all controlled by an

intuitive new console-mounted keypad to speed up data entry and minimize workload. The fully integrated GFC 700 digital autopilot features ultra-fast servos that instantly correct any deviation from perfect flight, while the jet-like panel-mounted mode controller makes it easier to keep your eyes on the instruments for safer IFR flying.

The Matrix offers avionics designed for the way you fly and the missions you fly most.
